I have a great passion for both digital and printed design. With a unique view of the design world and a great passion and drive to go with it. I love my tea so let's have a chat over a cuppa.

EXPERIENCE

2018 to current

MVad

Working a small agency based in Milton Keynes. Designing mainly for the automotive industry. Working up marketing ideas within print and digital for motor campaigns. Alongside marketing collateral to help the dealerships sell their core products.

2017 to 2018

FSE Design

Working within a fast paced team of designers and developers within two sectors of the business. Designing adverts for local businesses, alongside printed collateral and websites for schools. Part of my role includes helping to develop processes and refine communications.

2014 to 2017

Bluestep Solutions

Working within a medium sized design team, alongside an account team to produce products and campaigns for both private, public sector and non-profit organisations.

Within this role I have helped to bring in new clients and create pitch presentations to help win new work.

I have also been solely responsible for adding digital design to company's offering, by managing WordPress design and builds for new clients.

2012 to 2014

Yellowjelly & Partners

Assisting the Director to creatively complete live briefs from kick off to completion. Maintaining and improving client relationships. I completed varying projects from bespoke digital design to printed collateral.

This is where I began to truly understand the nuts and bolts of an agency from time scales to quoting and everything in-between.

2012

Jellyfish Creative

Collaborating within the design team on a range of projects from both print and digital design. This involved working within the team to brainstorm and come up with unique marketing and design ideas for their clients. I gained valuable experience with senior designers and learnt how to design to meet client needs, manage expatiations and how to best manage my time.

2011

IAG Technology LTD

Working as part of a small team, we can up with ideas for a new website design, marketing literature and promotional collateral including banner and leaflet designs. This was a great opportunity to move IAG's brand forward and collaborate closely with another designer.

2010

2C'S Communication LTD

During this time I shadowed the senior designers, helping them with live briefs. This gave me valuable experience of working for a graphic design agency.
